Referee Notes

Quin Darcy

March, 29 2021

1. In Example 4.8.(b), "trivial module" should be natural module.

2. In Example 4.6, there is an incomplete "mathbb".

3. In Example 4.1, "identity" should be replaced with "identify".

4. In Example 4.8.(a), "$u \in \mathfrak{sl}_2$", is never used.

5. In Example 4.8.(b), "basis $\{x, h, h\}$" should be $\{x, y, h\}$.

6. On page 27., at the bottom, it is slightly unclear at first glance that the super script is is not an exponent in the summation.

7. On page 18, in A2 of associative K-algebra, we have $a, b, c \in A$, but c is never used.
